“ *David Robson - my Uncle Dave - had a positive effect on my life, and I feel fortunate to have known him. We first became close when I was living abroad and sending letters to my grandmother, who was suffering from dementia. Uncle Dave would take my letters to Grandmother and read them to her. He thanked me once for giving him a reason to visit his mother, but I know that he would have done so no matter what. He helped care for both of his parents in their final years because he was a good man. I loved my uncle, as did my father, who only had good things to say about his brother for as long as he lived and who expressed his love for his brother whenever they talked on the phone or visited in person. They had a special connection, which I was lucky to witness. - Gary Robson*

“ *Dave and I, along with two others who worked at the DuPont Experimental Station, car pooled to work for several years. We made memories as we told of those things we did on the job that we could laugh about. Blessings to each family member as you share your memories and honor his legacy.*
