“ I hope Randy’s family can find peace in knowing that he was loved and appreciated by so many! I worked with Randy at Siemens and he would attend to my labs needs no questions asked every time— a reliable and honorable man. Before I went on maternity leave Randy gave me one piece of advice, “elbows out!”, in the instance that I bumped into a counter or wall, my elbows would catch the impact and not my sons head! Rest in heaven Randy!

“ Randy kept our work instruments up and running, always friendly to everyone in the lab as we all worked, laughing, telling jokes. When stress was high, he brought calm and joy. I hope we all share light with one another as he did.

“ You are going to be missed my friend. Being remote now for over 3 years, I've lost touch with many people but I always remembered the chats we had on many different subjects. You meant a lot to many people, for many different reasons. You were seen and felt, and had an impact on all those you met.

“ I'm so sad to hear about Randy's passing. We had not communicated for several years but for over 17 years he was our senior QA Lab Technician for Arlon. There was no project or problem that Randy could not tackle. His work ethic was contagious and we shared many a laugh. He loved Halloween and many of his 'scare tactics' were perfected using props from work. A really great guy and a good friend, he will be missed by all who knew him.

“ One of the kindest men I have ever met. He had the biggest heart and loved so deeply. He has left a huge hole in a lot of people’s lives. Randy loved with a full heart and brought so much love and kindness to those he knew, and people he never met in his life. This was Randy. He has taught us such warmth and compassion, may we all keep these lessons deep in our hearts, in honor of this wonderful man. I will do as promised buddy. I love you. Carol Savner

“ I was honored to have Randy as my brother. So many memories. He loved to make others laugh. If you needed anything he had a garage full of fix-it stuff - he was the master at volunteering to help others.

Throughout his whole life, he remained a big kid at heart. Summer times it was always a big pool in the backyard and a driveway full of power ride on cars and lots of games and toys.

House was filled with dozens of train sets and lots of food to share.

Baby brother I will miss you so much.
